

## **BLUE MOON QUOTED ON PINK SHEETS AND DTC ELIGIBLE; POSITIVE IMPACT FROM US CORPORATE TAX RATE REDUCTION**

**January 23, 2018** – Blue Moon Zinc Corp. (TSXV: MOON; US OTC: BMOOF) (the “**Company**”) is pleased to report that the common shares of the Company are now quoted for trading in the United States on the OTC Pink Sheets under the trading symbol BMOOF. In addition, the Company’s common shares are eligible for delivery and depository services of The Depository Trust Company (the “DTC”) to facilitate electronic settlement of transfers of its common shares in the United States. Securities that are eligible to be electronically cleared and settled through the DTC are considered “DTC eligible.” This electronic method of clearing securities speeds up the receipt of stock and cash, and thus accelerates the settlement process for investors and greatly reduces transactional costs for participating stock brokerages. Investors can find the current Canadian financial disclosure of the Company on [www.sedar.com](http://www.sedar.com).

Effective January 1, 2018, corporate tax rates in the United States were reduced from 35% to 21%, among other changes favoring US businesses. The Company’s Blue Moon zinc deposit is domiciled in the US and the corporate tax reduction is expected to be beneficial to the project and the Company’s Preliminary Economic Assessment (“PEA”) expected to be released in late Q1 2018.

Patrick McGrath, Chief Executive officer, stated, "The US quotation with DTC eligibility should enhance and simplify trading of our shares in the US. The Company’s Blue Moon Zinc deposit is based in the US and we believe being quoted and tradable in the US is complimentary. We also welcome the recent US corporate tax reduction to 21% which we believe will improve the economics in the upcoming PEA"

### **About Blue Moon**

The 100% owned Blue Moon polymetallic deposit has a Mineral Resource estimate of 3.7 million indicated tons with a grade of 8.3% zinc equivalence including approximately 377 million pounds of zinc and 4.1 million inferred tons with a grade of 7.8% zinc equivalence including approximately 395 million pounds of zinc with significant credits of copper, silver and gold. The resource is open at depth and along strike and historical metallurgical testing indicates excellent recovery and a clean zinc concentrate. A NI 43-101 report detailing the resource and summarizing metallurgical recoveries is available on the company’s website ([www.blumoonmining.com](http://www.blumoonmining.com)) and filed on SEDAR on November 13, 2017. The Company plans to advance the Blue Moon project through to feasibility, permitting and ultimately production.
