

Blue Moon Signs Drill Contract for 2021 Work Program

July 13, 2021 – Blue Moon Metals Inc. (TSXV: MOON; OTCQB: BMOOF) (the “Company”) announces it has signed a drilling contract to carry out its 2021 drill program on its 100% owned Blue Moon polymetallic volcanic massive sulphide (“VMS”) project in the United States. The core drilling campaign is expected to commence in late August and is designed to explore for down dip extensions of the deposit as well as to test for additional lenses to the south of the currently defined deposit.

“Over the past few months Blue Moon has spent considerable time reviewing the historical data and identified multiple exploration drilling opportunities, all of which could dramatically change the upside potential size of the Blue Moon deposit. This is an exploration program our team has been anxiously awaiting to start.” Commented Patrick McGrath, CEO of Blue Moon.

About Blue Moon Metals

Blue Moon Metals (TSX.V: MOON; OTCQB: BMOOF) is currently advancing its Blue Moon polymetallic deposit which contains zinc, gold, silver and copper. The property is well located with existing local infrastructures including paved highways three miles from site; a hydroelectric power generation facility a few miles from site, three hour drive to the Oakland port and a four hour drive to service centre of Reno. The deposit is open at depth and along strike. The Blue Moon 43-101 Mineral Resource includes 7.8 million inferred tons at 8.07% zinc equivalent (4.95% zinc, 0.04 oz/t gold, 0.46% copper, 1.33 oz/t silver), containing 771 million pounds of zinc, 300,000 ounces of gold, 71 million pounds of copper, and 10 million ounces of silver. The 43-101 Mineral Resource report dated November 14, 2018 was authored by Gary Giroux, P. Eng., and Lawrence O’Connor, a QP, and entitled “Resource Estimate for the Blue Moon Massive Sulphide Occurrence”. The 43-101 and related press release with details on the resource are available on the company’s website and were filed on www.sedar.com on November 20, 2018. The Company also holds 100% of the Yava polymetallic project in Nunavut that is in the same volcanic lithologies and south of Glencore’s Hackett River deposit. More information is available on the company’s web site (www.bluemoonmetals.com).

Qualified Persons

John McClintock, P. Eng, a Director of the Company, is a qualified person as defined by NI 43-101, has reviewed the scientific and technical information that forms the basis for this press release.
